

SPRING & SUMMER 2021

GLOBAL SOLAR PROJECT

CUSTOMER DOCUMENT

CONGRATULATIONS

YOU ARE NOW GOING GREEN

HERE IS AN OUTLINE OF THE NEXT 120 DAYS.

INSTALLATION DAY (1-30 DAYS)

After your installation our Senior Engineer will test the system and another member of our team will begin processing and setting up your online monitoring. We'll then set up an Independent Quality Assurance Inspection with you to perform a 32-point inspection of your installation. We generally like to schedule this inspection within 3-10 Days of the install so we can move the process along for you.

DO NOT FLIP THE SWITCH

The team leader will show you the Electric panel and the switch that will need to be turned on so that you are generating electricity from you panels. This switch isn't to be turned on until we give you the GREEN LIGHT which happens after your Utility company gives you the "Permission To Operate."

POST-INSTALLATION INSPECTION (30-45 DAYS)

While there for the post-installation inspection our team leader will be able to answer any questions you may have and highlight all the important information with you about your system.

MONITORING

Once your monitoring has been set up, you will receive an email with detailed information on the features in your monitoring portal.

SOLAR RENEWABLE ENERGY CERTIFICATES (SET UP)

If you live in D.C. or MD, you will also receive an email requesting that you research and choose one of the SREC Companies we recommend. Unfortunately, SRECs are currently not available to VA residents. Once you have selected an SREC Broker to handle your account, we'll begin the setup process for you.

PERMISSION TO OPERATE

From the time your installation is complete, and up until you are given “PERMISSION TO OPERATE” (PTO’d) by your utility company, we’ll be working closely with your city and county to get inspections completed promptly. Inspections are normally done within a month but can take additional time depending on the volume of inspections in your county or city.

INSPECTION DAY (45-90 DAYS)

Once we are given the inspection date by county and city officials, We’ll update you on the date. The time of your inspection will not be given to us until the morning of your inspection. On the Morning of your inspection, we will notify you of the window for inspection which is generally a 2-hour window.

After your system passes inspection, we notify your utility company and request the New Meter Installation. After the Net-Meter installation they will finalize the project and your system will be PTO’d. The notification that gives you Permission to Operate comes in an email and may be sent to a spam folder, so please be on the look out.

ALL SYSTEMS GO (60-120 Days)

You may now activate your system by:

FIRST - flip the switch on your breaker box ON.

SECOND - Outside your house on the panel move the disconnect to the on position!

If you need some assistance, please don’t hesitate to reach out to Global Solar Project and we can have an Engineer walk you through the process.

Now, sit back, relax, and enjoy your journey of going Solar with Global Solar Project!
Welcome to the family!

SOLAR EDGE

MONITORING PORTAL

YOU'LL RECEIVE AN EMAIL TO SIGN UP FOR SOLAR PRODUCTION MONITORING.

The cloud based SolarEdge monitoring platform provides enhanced PV performance monitoring and yield assurance through immediate fault detection and alerts at module level, string level and system level. That means you can see any issues across the entire system.

Some of the features of the monitoring portal are:

- Full visibility of your system's technical and financial performance
- interactive charts and site layout for your system
- Visualization of PV production, building consumption, and self-consumption
- Data presentation on module-level, string-level and site-level
- Comprehensive site-level and fleet-level reporting and analysis tools
- Option to schedule automatic reports and export reports
- Effective fleet management and improved O&M capabilities
- Automatic alerts on system issues
- Remote troubleshooting and access to real-time system data and guided root-cause fault analysis
- Historical and aggregated views with comparative analysis diagnostics
- Easy access from a computer, smartphone, or tablet
- Multiple options for social sharing and public display to drive referrals and generate leads
- Free for system lifetime

INCENTIVES & REBATES

HERE IS ALL THE INFORMATION ON YOUR INCENTIVES
THESE ARE LISTED IN THE ORDER YOU WILL PROCESS THEM.

1. THE MARYLAND REBATE PROGRAM

THIS SHOULD BE COMPLETED DIRECTLY AFTER YOUR SYSTEM IS TURNED ON
Maryland will send you \$1,000 as soon as you complete the paperwork.

PLEASE read through this page and accept the terms at the bottom and simply follow the steps to upload your documents.

This is the link - <https://egov.maryland.gov/mea/CleanEnergy/>

This is the QR code which you can scan with any device that has a camera - and you will be taken to the same URL above.

THESE ARE LISTED IN THE ORDER YOU WILL PROCESS THEM.

3. THE FEDERAL INCOME TAX CREDIT

YOU HAVE 18 MONTHS TO DECIDE ON THIS, WE RECOMMEND THAT YOU APPLY YOUR
INCENTIVE TO YOUR PRINCIPAL BALANCE TO KEEP YOUR PAYMENT AS LOW AS POSSIBLE.

If you would like to Keep the credit for yourself, please call to let us know.

1-877-3-SOLAR-4 is our direct office line.

4. SOLAR RENEWABLE ENERGY CERTIFICATES (SRECS)

CUSTOMERS MUST CHOOSE WHO WILL HANDLE THEIR SRECS.
OUR CURRENT RECOMMENDATION IS SRECTRADE OR SOL SYSTEMS

Solar Renewable Energy Certificates are realized on an annual basis and you have up to 3 years to sell them on the open market through exchanges that are similar to a stock market trading desk.

There are numerous companies that offer this service. In our 15+ years in business, these two companies continue to be our preferred partners.

SRECTrade, Inc.
(THIS COMPANY HAS A 7% TRADE COMMISSION)
